PROFILE

Front-end developer with **3+ years'** experience at creating and maintaining top-level user interfaces (including web sites and applications) using robust technical architecture for optimal consumer experience. Highly skilled at delineating complexity, having implemented several MVPs and commercial products from conception to execution while handling multiple projects simultaneously. Improved core web vitals by **up to 95%** while functioning on technical, business and product teams.

EXPERIENCE

N&S Tech (Nigeria)   Dec. 2020 – Present
Co-founder, Front-End Developer
- Built the tech service agency (frontend and backend development, mobile development, content writing and video editing) in collaboration with 6 diversely-skilled freelancers. Has led 20 staff across board to **deliver 12 end-to-end 5-star projects**.
- Developed skills in leadership, task management, cross-functional collaboration via Slack, Clickup and Trello, and clear communication.

Metrodao (U.S.A)   Apr. 2022 – Jan. 2023
Front-End Developer (Remote)
- Overhauled a web application MVP, enabled idea validation and implemented a viable commercial product for the seed-funding.
- Analyzed architecture and performance of industry competitors.

Amazéthu (U.S.A)   Sep. 2021 – Apr. 2022
Front-End Developer (Remote)
- Worked on a team to develop a tool for accessing services in any African language using deep learning and artificial intelligence. Collaborated with the CTO, Product Designer, Backend and DevOPs developers, to test and launch the product.
- Made design improvements and recommendations based on user and automated Testing.
- Comprehensively reviewed the product architecture by heuristic evaluation. Added a voice bot to the language console.

Frontendlabs (United Kingdom)   Apr. 2021 – Jul. 2021
Front-End Developer (Remote)
- Developed key skills in leadership, communication, personnel & performance management.
- Coordinated, clear communication of ideas and specifications between clients and developers, from ideation to launch.
- Established workflows to address structural gaps. Improved project turnaround time **by 60%+** without compromising development quality.

Quin. Video (U.S.A)   Dec. 2020 – Mar. 2021
Front-End Developer (Remote)
- Developed an EdTech video conferencing web application MVP.
- Consolidated skills in agile development, debugging, competitive analysis, and in developing reusable JavaScript, HTML and CSS code.
- Collaborated with the backend team to resolve architectural design challenges. Implemented testing feedback and reduced total bug frequency **to 3%**.
